Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in the United States on 1/24/02. It is noted, however, that applicant has not filed a certified copy of the United States' application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-7, 9-20, 22-29, and 31-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Petrenko (6,027,075).

Petrenko teaches a system and method for de-icing a surface of a system component 700 comprising an electrical conductor 702 proximate to the surface; an AC power source 702 for providing a high-frequency voltage at 60 Hz, with 10,000 volts in the electrical conductor 700 to melt ice at the surface, wherein the component 700 functions as an electrical sink for the alternating electric field, and an insulating spacer (Fig. 27) that separates the electrical conductor 702 and the component 700.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8, 21, 30 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petrenko in view of Wills et al (5,555,736).

Petrenko teaches substantially the claimed features including a system for de-icing a surface of the cableway component, comprising an electrical conductor proximate to the surface, an AC power source for providing a high-frequency voltage in the electrical conductor to melt ice at the surface, but does not disclose an AC with 180 degrees out of phase. Wills teaches a defrost system for refrigerant coils with an AC phase shift sufficiently less the 360 degree (Col.7, lines 40-45). It would have been obvious to one having ordinary skill in the art to use the phase shift sufficiently less the 360 degree as taught by Mills to defrost refrigeration coils.
